STONE TEST DATA: Tested at BRE, Garston www.bre.co.uk

Test Type	Norm	Results
Water Absorption	BSEN	4.75%
Porosity	BSEN 1936	17.20%
Density		2230 kg/m ³
Abrasion Resistance	BSEN 1314:2000	56 MPa
Compressive Strength	BSEN 1926 (1999)	
Durability	BSEN 1341:2001	Frost Damage Unlikely
Acid Immersion	BRE 141	Pass
Saturation Co-Efficient	0.67	0.58%

TECHNICAL DETAILS:

Geographical Type:	Carboniferous, Millstone Grit
Main Colour:	Lilac/Grey
Colour Variations:	White Intrusions
Texture:	Medium Grain
Availability:	Contract up to 10,000m ²
Average Block Size:	2000L x 1000W x 1000Hmm

Colours in this brochure are as accurate as the printing process allows and actual sight of the material is strongly recommended.

WATTSCLIFFE LILAC GRITSTONE

Quarried at Elton in Derbyshire, this quarry yields some of the most consistently large blocks in the UK. The stone is uniformly lilac/grey in colour with occasional buff/white intrusions.

Wattscliffe is most commonly known for its use in the Coronation Building, Southport in 1926 and Victoria Square in Birmingham in 1995. This material is particularly apt for Perthshire in Scotland and Southern Germany although it would also grace many other areas.
